

ACS WebService™

Software-as-a-Service Security Management

Easy to use, Versatile, Scalable

ACS WebService is a Web-hosted access control solution that leverages the power and versatility of the Internet. It provides reliable, real-time access control administration of your facilities. There's no software installation, no server set-up, and no IT hassles. The entire system can be administered over the Internet from virtually any browser...anywhere, anytime!

ACS WebService Account Administration

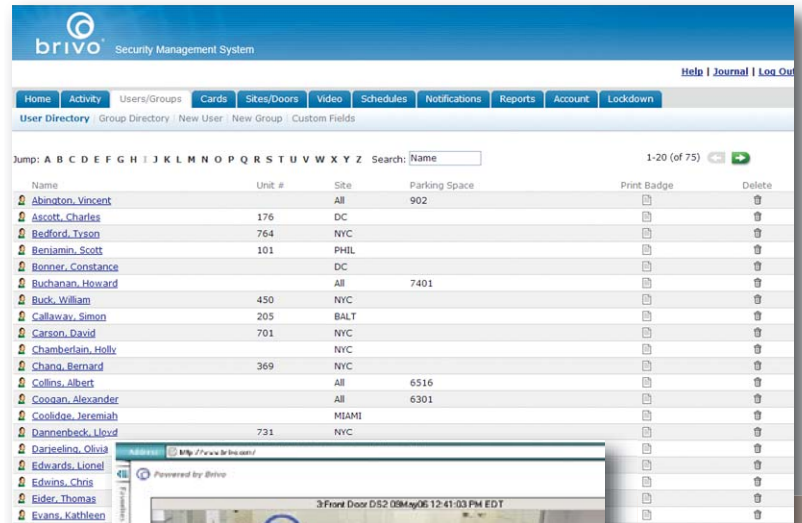

- Web browser interface for all administration—including Activity Log
- Reports, activity log, and journals let you keep close tabs on system activity
- Multiple logins for security and partitioned database access
- Up to 25,000 users/credentials per control panel
- Audit trail of administrative actions
- Infinitely scalable for unlimited expansion
- New firmware updates available online at no additional cost

IP Connectivity and Interfaces

- TCP/IP—works on any network
- 128-bit SSL encryption—your information is secure
- DHCP (Default) or Static IP—little or no IT resources needed
- XML Application Programming Interface (API) included—integrates with other systems to streamline processes, saving you time and money

System Highlights

- No software to install, no dedicated PC needed
- System is fully accessible from any Web browser
- Notifications of alarms via email, pager, or cell phone
- No servers or IT support needed—backups, archives, and upgrades all handled by the Brivo data center
- Intuitive interface means end-user training is a snap
- DVR integration enables viewing of live or event-related video
- Badge design and printing interface fully integrated into application
- Antipassback features

Use your Web browser to access your entire

account. The simple interface has you up and running with almost no training. Cameras work with either the fully integrated DVR module or our Online Video Recorder (OVR™) service. Both enable remote viewing of video that is fully integrated into the application for seamless management of your system.

Online Video Recorder Service

- Access video for all of your locations in one centrally managed account
- Only cameras on site—no other equipment needed
- Fully encrypted and secure
- No IT support required
- Online video storage means no wasted expense—don't pay for storage and resources you don't need!

ACS WebService™

Software-as-a-Service-Security Management
